Invitation to participate in the X. edition of LABOREXPO trade fair

Dear Madam, dear Sir,

we would like to invite you to attend the next, already tenth edition, of the trade fair for analytical, measurement and laboratory technology – LABOREXPO, which will be held on June 01–02, 2022 at the PVA EXPO PRAGUE exhibition centre.

Due to its specific focus and size LABOREXPO is the most important trade event for the area laboratory practice in the Czech Republic. It's the ideal place to deepen and develop customer trade relations and sales support. The structure of the visitors includes owners or managers of laboratories, R&D personnel, quality control and manufacturing staff, laboratory technicians and analysts in various positions. They are coming to the fair with clear requirements and specific interest in the products offered. The average attendance is around 1500–2000 people and expecting more because of the co-operation with the Academy of Sciences of the Czech Republic, which is organizing the Science Fair held in June 02–04/06/2022 at the next-door Halls 3 and 4 of the PVA EXPO PRAGUE. Visitors of both exhibitions and all the accompanying events have free entry.

The organizer of the fair is editorial team of journal CHEMAGAZÍN, which is also its main event media partner. The preparation of the exhibition is simultaneously involved in various professional organizations, scientific institutes and exhibitors too.

The fair is held only once every two years. Therefore, we believe that you will decide to participate and introduce your products in addition to other major suppliers of laboratory equipment. For more information about renting exhibition space, including its deployment, the registration process or services associated with participation in the fair can be found in the attached materials. Visit also the web site www.laborexpo.cz, which will publish the current list of exhibitors. If necessary, we are available for personal discussions, please feel free to contact us.

Thank you for accepting the invitation to LABOREXPO 2022 and we're looking forward to cooperation.

With best regards,

Tomas ROTREKL - event manager
